

Parents,

With respect to charter schools, a June 27, 2013 Memorandum from the Florida DOE states, "...if a student has selected a full-time choice option within the school district, such as a magnet program [or charter program], the school district [or charter school] may condition the student's continued enrollment in that choice option upon maintaining full-time enrollment." This means that students who choose to enroll in Hollywood Academy of Arts & Science may only select from the virtual classes that we offer. Staying within our school's curriculum offerings will ensure that the student maintains his/her "full-time" enrollment status and will ensure that the student maintains integrity with the choice options offered by Hollywood Academy of Arts & Science.

With these changes in mind, Hollywood Academy of Arts & Science is committed to offering a variety of virtual courses incorporated into our proven curriculum and supported on-site by Hollywood Academy of Arts & Science teachers. If you have any questions, please contact Hollywood Academy of Arts & Science for a list of available courses and the process for enrolling in a virtual course.

Sincerely,

Mr. Mark Hage  
Principal  
Hollywood Academy of Arts & Science
